

Our Oceans

Reefs are the world's largest living structures made up of a vibrant ecosystem of great natural resiliency and beauty. However, around the world, climate change is creating more frequent and severe coral bleaching, ocean acidification and more extreme weather events, all of which harm our reefs.

Reef Restoration Program

In partnership with Oceanus A.C., Mayakoba has committed to a five-year reef restoration program where, through the creation of new coral nurseries and planting efforts, we hope to recover and reconnect patches of local reefs.

1

10 new **nurseries** surrounding Mayakoba.

2

Monitoring of colonies by expert marine biologists.

3

Outplanting of living, healthy, genetically diverse coral colonies.

4

Healthy Reef, our goal is to plant more than 5,000 new colonies.

Itinerary

JULY 2023

SNORKEL BIOLOGY IN ACTION

Location:

Dive & Water Sports Center

Join our team of biologists in an amazing expedition to the coral reef and see first-hand how they plant 500 new coral colonies in our beautiful Mexican Caribbean. The whole family can snorkel over them and learn how reef restoration is done.

 Please arrive 15 mins. prior.
Paid activity.

LEARN

Location:

Your Hotel's Beach Club

Come and learn everything about coral reef restoration with our sample nursery and find out more about the special activities we have prepared for you. Look for our Reef Week staff who will have a gift for you!

INTERACTIVE

Location:

In the Sea at the Dive & Water Sports Center

Watch our real demonstration of how coral fragmentation is done to plant new colonies and help save our reefs.
